EF SET Certificate

Profile

Full-Stack Developer (React, Next.js, Hono, NestJS) delivering accessible, high-performance UIs and lightweight backend routes for Disney at Globant. Skilled in TypeScript, Node.js and PostgreSQL; champions design systems, scalable code and mentoring.

Professional Experience

11/2025 – Present
Cali, Colombia

Globant [🔗](#)

Semi Senior Advanced Web UI Developer

Design and implement high-quality, accessible digital experiences for Disney using React.js and Hono, collaborating with cross-functional teams to deliver end-to-end solutions.

- Build performant, reusable UI components and pages in React.js and implement lightweight backend routes with Hono to support client features.
- Partner with design and product to refine UI/UX in Figma, ensuring consistency with Disney brand guidelines and accessibility (WCAG) standards.
- Optimize performance and developer experience through bundle-size improvements, monitoring and contributions to shared design system patterns.

06/2024 – 11/2025

Rootstack [🔗](#)

Mid Full Stack Developer

Contribute to building scalable, user-centric web applications that transform client requirements into impactful digital solutions.

- Develop modern, high-performance interfaces with Next.js and design robust backend services with NestJS.
- Worked on a project to develop an interface for managing ALS systems on ships, integrating with onboard systems and collaborating with stakeholders (Next.js/ NestJS).
- Create prototypes in Figma and collaborate in agile teams through peer reviews and knowledge sharing.

04/2022 – 06/2024

Sociedad Privada del Alquiler [🔗](#)

Junior Developer

Supported development of internal business applications for a multinational real estate group operating in Colombia and Spain.

- Implemented responsive features with React, Next.js and Astro; added mobile support with Flutter.
- Collaborated with product, design and QA to deliver user-focused solutions; improved code quality via component patterns, docs and reviews; mentored new hires.

Education

01/2023 – 07/2026
Cali, Colombia

Systems Engineering

Institución Universitaria Antonio Jose Camacho [↗](#)

Expected B.Sc [↗](#) . in Systems Engineering (June 2026). Relevant coursework: Software Engineering, Data Structures & Algorithms, Databases, Web Development. Thesis: Designed and implemented a full-stack platform using Next.js (frontend) and NestJS (back end) to create interactive learning guides aimed at increasing awareness and stewardship of water resources in Cali, Colombia. Implemented RESTful APIs and integrated a PostgreSQL database; delivered a responsive, accessible UI for content authoring and learner tracking. Skills: Next.js, NestJS, React, Node.js, PostgreSQL, REST APIs, Git, Agile.

10/2020 – 10/2022
Cali, Colombia

Technologist in analysis and development of information systems

SENA [↗](#)

Technologist diploma focused on software development, systems analysis, and database management. Completed practical projects and workshops emphasizing full-stack development and system implementation.

Capstone: Developed a CRUD web application to manage business workflows, implementing front-end interfaces and back-end services with JavaScript and SQL-based persistence.

Key skills: JavaScript, HTML/CSS, SQL, Git, software lifecycle practices.
